Course Description

The COBLATION™ course at the Ospedale Dell'Angelo in Mestre is designed to provide participants with the opportunity to learn from expert surgeons in a hospital environment. They will observe live surgery and have the opportunity to discuss surgical procedures, techniques and devices, as well as participate in workshops to gain better experience on the techniques needed when using COBLATION technology. There will be a presentation explaining COBLATION technology to allow participants to understand the principles of its use, as well as appreciate how it can improve patient outcomes.

Focus

The use of COBLATION technology for tonsillectomy, turbinate reduction and uvulopharyngoplasty procedures

Chairman

Roberto Spinato
